### What Is National Night Out

National Night Out is an annual community-building campaign that promotes police-community partnerships and neighborhood camaraderie to make our neighborhoods safer, more caring places to live. National Night Out enhances the relationship between neighbors and law enforcement while bringing back a true sense of community. Furthermore, it provides a great opportunity to bring police and neighbors together under positive circumstances.

Millions of neighbors take part in National Night Out across thousands of communities from all fifty states, U.S. territories and military bases worldwide on the first Tuesday in August (**Texas and select areas celebrate on the first Tuesday in October**). Neighborhoods host block parties, festivals, parades, cookouts and various other community events with safety demonstrations, seminars, youth events, visits from emergency personnel, exhibits and much, much more.

**WE LOOK FORWARD TO SEEING YOU ON OCTOBER 5th**

## Summer—Tis the Season for Flowers

By the *Lazy Gardener*

Let me start with an observation, despite the damage sustained from the winter's storm, the neighborhood has never looked better. I see improvement from year to year but the events of the past year seems to have spurned the gardener in many of us. To you – Salute! Keep it up, it shows, and it appears to be contagious. I urge you to look into the PGNA Gardeners Club on Facebook and connect with your gardening neighbors, many you never knew lived so close to you. I never met a bad gardener.

Now onto this month's topic – FLOWERS. Who doesn't love flowers, there is something for everyone's tastes. This topic is very broad and space precludes me from gushing so to keep it short and simple, let's keep the discussion to the difference between annuals and perennials, other than one costs five times as much, but... which one? Keep reading, you may be surprised.

All flowering plants follow the same basic life cycle. Annuals complete that cycle in one growing season, whereas perennials live on for three years or longer. If you begin reading about your plant purchases, you'll discover many twists on this basic definition. You'll come across terms such as "hardy" and "half-hardy" annual, or tender perennial, and then they tell you there's a third plant category: biennials; that combine some of the characteristics of both plant types.

Trying to compare annuals and perennials is pointless, neither is superior to the other. Integrating both types into your garden designs (along with shrubs and trees) will give you the best of both worlds and unlimited options in color, texture, form, and bloom time.

What is an Annual? True annuals are plants that germinate, flower, set seed, and die all in one season. Their ultimate goal is to reproduce themselves (set seed), which is good news for gardeners because most annuals will flower like mad until their mission is accomplished. And, if you use methods such as deadheading to prevent seed formation, many annuals will amp up their flower production and continue to bloom profusely until the first frost arrives. Although you'll need to replant most annuals the following spring to get a repeat performance, some will readily self-sow and return the following year, such as snapdragons and periwinkles.

Annuals can be subdivided into three groups: Cool season, which thrive in cool to moderate temperatures of spring and fall, some can tolerate Texas winters. Warm-season annuals are native to tropical or subtropical climates and require heat to grow and thrive, they often perform poorly during cold weather. Wait until mid-spring to add these plants to your garden beds or containers. The last category are half-hardy annuals, they are the most common and tolerate a wide range of temperatures, including periods of cooler weather near the beginning or end of the gardening season.

Unlike their short-lived counterparts, perennials are typically cold-hardy plants that will return again for several years. They usually bloom for only one season each year (either spring, summer, or fall), but there are also reblooming and long-blooming perennials. When grown in favorable conditions, perennials often live a long time, but don't assume they will last forever. Their life span is variable, and some may live for only three to five years. Perennials also vary greatly in terms of their care and maintenance. Some are tough and undemanding, seeming to thrive on neglect but some need to be pruned and/or divided regularly to maintain their vigor and keep them tidy. This is a great way to make new friends and maybe enhance your garden by swapping plants with your neighbors.

So why choose annuals?

- 🌸 Growing annuals can be a great way to take gardening one year at a time. They can be grown from seed, allow you to experiment with new plants and color schemes without making a long-term commitment or investment.
- 🌸 Annuals are perfect for temporarily filling in bare spots in established gardens or refreshing containers through the season.
- 🌸 Add annuals to a vegetable garden for a splash of color, to fill in gaps when early-season crops are harvested and attract pollinators to increase production of edible crops. Some even help fend off garden pests!
- 🌸 Annuals provide nearly instant gratification, maturing faster than perennials or biennials, and often bloom from planting time until frost, and in some cases beyond.
- 🌸 If you want a lot of blooms, annuals are the answer. They put all of their energy into developing flowers.

Why choose perennials?

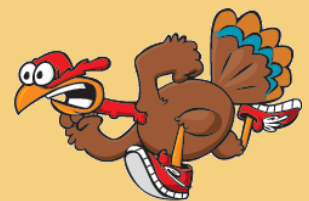

- 🌸 Although perennials tend to cost more initially, they are a good long-term investment because they return year after year.
- 🌸 Even perennials that don't have a long-life span can often be propagated by division or by reseeding to perpetuate their population.
- 🌸 Most perennials require less water once established, which can be especially advantageous for those who garden in dry drought-prone areas and want to reduce their water consumption.
- 🌸 Planting perennials that are native to your region offers the additional benefit of creating a welcome habitat for pollinators, think butterflies.

But why choose, why not the best of both worlds. Happy gardening and remember Pinterest is a great source of inspiration and a great starting point.

# Park Glen Scouting

By Bob Kilburn

Well, the Summer is drawing to an end and your neighborhood Scouts are wrapping up their Summertime activities. School is just around the corner and that can only mean it is primetime for recruiting Cub Scouts so be on the lookout for Scouting events around the neighborhood from now on and through the fall to add to our numbers. The Scouts are in the process of doing their annual planning to develop plans for all the fun things they will be doing this year. Camping, canoe races, fishing, hiking video gaming tournaments are some of the things they have done in the past.

What a summer for Scouts from Troop 205, 2205 and Crew 205, Where to begin. They just returned from Scout Heaven, attending High Adventure Base Philmont Scout Ranch located in Cimmaron New Mexico in the Sangre de Cristo Mountains of the Rocky Mountains. They hiked over 120 miles, backpacking the whole way. They climbed half a dozen peaks. Congrats! A lifetime of memories in one summer. And that's not all, some attended Cub Scout Day Camp, others went to Summer Camp in Mineral Wells where they worked Merit Badges, shot rifles, fished, did some Archery, even some downhill skiing.

I could go on, Crew 205, went on a camping trip to the west coast and back, sponsored a water fight for all scouts in the park. Did some Putt, Putt and Go Karts along with everything else and lots of scouts participated in the Park Glen Parade.

I will leave you with this. It's Popcorn time and Scouts are raising money to support the great program we have in place. Thank You for your support.

**Prep Time:** 10 minutes  
**Cook Time:** 20 minutes  
**Total Time:** 30 minutes  
**Servings:** 6 servings

## Ingredients

4 boneless skinless chicken breasts (about 2 pounds)  
1 cup crushed Ritz crackers (about 24 crackers)  
4 ounces parmesan cheese shredded  
1 tablespoons dried parsley flakes  
2 tablespoons ranch dressing  
2 teaspoons garlic salt

In a food processor, pulse together crackers, shredded Parmesan, and dried parsley (alternatively, you could crush the crackers by hand and stir together with the cheese and parsley.

Spray a 9"x13" pan with cooking spray to prevent sticking. Place chicken in the pan and sprinkle with garlic salt.

Brush chicken evenly with Ranch dressing, then sprinkle cracker mixture on top. Press the cracker mixture into the chicken lightly with your hands.

Bake in a preheated 400 degree oven for about 20 minutes. Tops should be golden brown. If additional browning time is needed, place chicken under the broiler for a couple minutes.

Serve hot.
